## **DETAILED ACTION**

## Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 1-8 are allowed because the prior art fail to teach or fairly suggest the claim invention.

Regarding Bruesselbach (US Patent No. 5208881), Bruesselbach discloses in Figure 3 a combined laser light source comprising a plurality of semiconductor lasers L1-L3; an optical fiber 30 with core; an optical system 32 converging a bundle of laser beams emitted from the lasers to the core of the fiber. However, Bruesselbach fails to teach an area of an end face of the core when steady temperature is performed on the laser light source, where the area is concentric with the end face of the core, and has a diameter equal to or smaller than half of a diameter of the core. Bruesselbach only teaches that the beam spots are just smaller than the diameter of the core.

Regarding Haruta (US Patent No. 5633967), Haruta also discloses the same system with the diameter of the beam spot being smaller than the core diameter of the optical fiber but fails to teach the beam spots being concentric with the fiber core and equal to or smaller than half of the core diameter.

Both of the references do not teach a method for adjusting alignment of the laser light in a combined laser light source with the step of determining two positions of said light entrance end at which the light intensity is measured in step (b) is equal to a certain value which is smaller than a maximum value of the light intensity measured in step (b) and aligning/placing the

fiber/said optical axis of said convergence lens with a middle position between two positions determined previously.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Communication Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Nguyen whose telephone number is 571-272-1947. The examiner can normally be reached on 9:00 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MINSUN HARVEY, can be reached on 571-272-1835. The fax phone number for the organization where this application or proceeding is assigned is **571-273-8300**.
